CAREER OBJECTIVE

A motivated engineering student seeking an entry-level position or collaborative project role across diverse domains where I can apply my technical skills, including expertise in React.js, Material-UI, and Firebase. Passionate about learning and growing, I aim to contribute to innovative solutions, enhance my knowledge through practical experience, and work collaboratively to deliver impactful results.

EDUCATION

Jodhpur Institute Of Engineering And Technology, Jodhpur(B.Tech)

2021 Jul – 2025 Jul

Aggregate CGPA:8.2 (till 6th Sem)

Complete 12th from S.D.S College Chapra(BSEB Board)

2018 Apr – 2020 Apr

Percentage:72%

Complete 10th from G.R High School Chapra(BSEB Board)

2016 Apr – 2018 Apr

Percentage:71.4%

INTERNSHIP

Nulark Solutions, Web Developer ✉

2024 May – 2024 Aug | Mangalore

- Create responsive web applications using HTML, CSS, and JavaScript.
- Utilized frameworks like React.js to create dynamic application to Enhance user Interface.
- Using Firebase Authentication for secure the user login and authorization data.
- In Firebase using Realtime database to support dynamic web applications.

TRAINING

Web Development ,InternShala ✉

- Learned to design ,develop and deploy full-stack web applications.
- Gained hands-on experience with React, including building reusable components and working with state management.
- Learn the Html,CSS ,Javascript and react js.

ACHIEVEMENTS

- Achieved a Five-star rating on HackerRank platform.
- Secured the 59th All India Rank in the Code Crusaders KCET competition organized on the Coding Ninjas online platform.

VERSION CONTROL

Git,GitHub

SKILLS

- HTML, CSS, JavaScript, React-js,SQL,Firebase

PROJECT

Entertainment web app ✉

- Created a movie application using React and Material-UI, including a responsive Navbar, movie carousels, and detailed movie information pages.
- Built a Navbar with a search bar and voice search using the Web Speech API to improve user experience.
- Developed a movie carousel displaying trending movies from The Movie Database (TMDb) API, organized into categories like "Streaming," "On TV," "For Rent," and "In Theater."
- Designed interactive movie cards using Material-UI Joy, with a YouTube play icon for watching trailers.
- Created the MovieDet component to show detailed movie information, using ReactPlayer for video playback and styled-components for a clean design.
- Ensured smooth navigation using React Router, allowing easy access to sections like "Movies," "Latest," and "Bookmarks."
- Focused on mobile responsiveness, using drawer components for easy navigation on smaller screens.

Quiz App ✉

- Utilizes Firebase for easily user registration, login, and logout functionalities, including both email/password and Google authentication methods.
- Implements React Router for smooth navigation between different components like Home, Login, Register, Quiz Detail, Create Quiz, Edit Quiz, and Quiz List.
- Firebase Realtime Database is used to store and retrieve quiz data, ensuring real-time updates and data persistence.
